EDUCATION

Vishwakarma Government Engineering College

Bachelor of engineering in information technology; CGPA: 7.6

Chandkheda, Ahmedabad

July 2018 - May 2022

SKILLS SUMMARY

- **Languages:** C, C++, HTML, JavaScript, typescript
 - **Frameworks:** React.js, React-Native, Node.js
 - **Database:** MySQL, MongoDB
 - **Platforms:** VS Code, Cursor, Qoder Android Studio, Xcode
 - **Soft Skills:** Problem-Solving, Adaptability, Excellent communication, AI tool utilization
-

WORK EXPERIENCE

SOFTWARE DEVELOPER | PALM INFOTECH | SURAT

June 23- November 24

- Built and launched the Onepay fintech app with React Native and an admin dashboard in React.js, enabling smooth transactions and efficient management for thousands of users.
- Enhanced user engagement by integrating deep linking, Firebase push notifications, and subscription workflows. Also developed face-scanning and one-to-one chat features in AugmentMe using Ably.
- Bridged the gap between business and tech by collaborating with testers for quality assurance and working directly with clients to translate requirements into impactful features.
- Delivered real-time communication experiences by implementing chat functionality, Google OAuth login, secure authentication (Node.js), and live Socket.io messaging in a service-based application.
- Twice awarded "Best Performer of the Month" for consistently delivering high-quality solutions, exceeding expectations, and contributing to project success.

SOFTWARE DEVELOPER | VASUNDHARA INFOTECH | SURAT

May 25- Present

- Engineered a large-scale video and chat application using WebRTC for seamless real-time communication, ensuring high performance and reliability.
 - Integrated OneSignal notifications to boost user engagement and retention with personalized alerts.
 - Developed an event management scanner app, streamlining ticket validation and attendee check-ins for smooth event operations.
 - Actively contributed to company innovation by participating in internal hackathon events, collaborating on creative solutions and rapid prototyping.
-

PROJECTS

VIBETALK : [Link](#)

- Created a Chat-app using React.js, Tailwind-CSS and Node.js with MongoDB as the database. MongoDB with authentication and multiple color themes.
- Implemented JWT authentication and Google OAuth for secure signup and login.
- Implemented one-on-one chat using Socket.io with a typing indicator for real-time communication.

FLIKUP : [Link](#)

- Created a Built with Expo, offering seamless one-to-one chat and high-quality video calling powered by WebRTC. as the database.
- Implemented dynamic light/dark themes to deliver a modern, user-friendly experience across devices..
- Optimized real-time interactions with smooth UI, instant messaging, and reliable connection handling.
